Volume 73 (1994)

Biltonen, R.L. 73, 209
Bloom, M. 73, 27
Brockman, H. 73, 57
Brown, M.F. 73, 159
Burack, W.R. 73, 209

Cézanne, L. 73, 139

Devaux, P.F. 73, 107

Evans, E. 73, 39

Gaub, H.E. 73, 81
Glaser, M. 73, 121

Hofmann, U.G. 73, 81

Jørgensen, K. 73, 3

Kinnunen, P.K.J. 73, 181
Kõiv, A. 73, 181

Lehtonen, J.Y.A. 73, 181
Lentz, B.R. 73, 91
Lopez, A. 73, 139

Mouritsen, O.G. 73, 3
Mustonen, P. 73, 181

Piknova, B. 73, 139

Rytömaa, M. 73, 181

Schram, V. 73, 139
Sekimizu, K. 73, 223

Thewalt, J. 73, 27
Tillmann, R.W. 73, 81
Tocanne, J.-F. 73, 139
Tournier, J.-F. 73, 139

Welby, M. 73, 139
Welti, R. 73, 121

Yeung, A. 73, 39

Zachowski, A. 73, 107

Subject index

Volume 73 (1994)

AFM; Monolayer; Langmuir-Blodgett-Films; Polymerizable lipids; Molecular lattice; Fluorescence 73, 81

Amino-phospholipid translocase; Phospholipid asymmetry; Flippase; P-glycoprotein; Cell shape; Phosphatidylserine 73, 107

Bacteriorhodopsin; Membranes; Lipid microdomains and macrodomains; Protein-lipid interactions; Hydrophobic mismatch; Lateral diffusion 73, 139

Bilayer mechanics; Vesicle shape dynamics; Stratified membranes; Interlayer coupling and dissipation; Vesicle bilayer tethers 73, 39

Bilayer membranes; Dipole potential; Surface potential; Monolayers; Lipid domains; Hydration force 73, 57

Biomembranes; Peripheral proteins; Lipids; Lipid-protein interactions 73, 181

Cardiolipin; DNA replication; DnaA protein; SV40 T antigen; DNA topoisomerase I; Histones 73, 223

Cell shape; Phospholipid asymmetry; Amino-phospholipid translocase; Flippase; P-glycoprotein; Phosphatidylserine 73, 107

Cholesterol; Phospholipids; Phase transition; Phase-separation dynamics; Local order; Dynamic heterogeneity; Lipid domains; Drugs 73, 3

Correlation time; Time scale; Length scale; Nuclear magnetic resonance (NMR) 73, 27

Cytoskeleton; Membrane structure; Lateral phase separation; Immiscible mixtures; Lipid-protein interactions; Membrane function 73, 121

Dipole potential; Surface potential; Bilayer membranes; Monolayers; Lipid domains; Hydration force 73, 57

DNA replication; Cardiolipin; DnaA protein; SV40 T antigen; DNA topoisomerase I; Histones 73, 223

DNA topoisomerase I; DNA replication; Cardiolipin; DnaA protein; SV40 T antigen; Histones 73, 223

DnaA protein; DNA replication; Cardiolipin; SV40 T antigen; DNA topoisomerase I; Histones 73, 223

Drugs; Phospholipids; Phase transition; Phase-separation dynamics; Local order; Dynamic heterogeneity; Lipid domains; Cholesterol 73, 3

Dynamic heterogeneities; Phospholipase A₂; Lipids; Lateral phase separation; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209

Dynamic heterogeneity; Phospholipids; Phase transition; Phase-separation dynamics; Local order; Lipid domains; Cholesterol; Drugs 73, 3

Enzyme activation; Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics 73, 209

Enzyme kinetics; Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme activation 73, 209

Fatty acids; Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209

Flash photolysis; Lipid; Membrane; Rhodopsin; Signal transduction; Vision 73, 159

Flippase; Phospholipid asymmetry; Amino-phospholipid translocase; P-glycoprotein; Cell shape; Phosphatidylserine 73, 107

- Fluorescence**; AFM; Monolayer; Langmuir-Blodgett-Films; Polymerizable lipids; Molecular lattice 73, 81
- Fusion**; Polyethylene glycol; Membrane structure; Mechanism 73, 91
- Histones**; DNA replication; Cardiolipin; DnaA protein; SV40 T antigen; DNA topoisomerase I 73, 223
- Hydration force**; Dipole potential; Surface potential; Bilayer membranes; Monolayers; Lipid domains 73, 57
- Hydrophobic mismatch**; Membranes; Lipid microdomains and macrodomains; Protein-lipid interactions; Lateral diffusion; Bacteriorhodopsin 73, 139
- Immiscible mixtures**; Membrane structure; Lateral phase separation; Lipid-protein interactions; Cytoskeleton; Membrane function 73, 121
- Interlayer coupling and dissipation**; Bilayer mechanics; Vesicle shape dynamics; Stratified membranes; Vesicle bilayer tethers 73, 39
- Langmuir-Blodgett-Films**; AFM; Monolayer; Polymerizable lipids; Molecular lattice; Fluorescence 73, 81
- Lateral diffusion**; Membranes; Lipid microdomains and macrodomains; Protein-lipid interactions; Hydrophobic mismatch; Bacteriorhodopsin 73, 139
- Lateral phase separation**; Membrane structure; Immiscible mixtures; Lipid-protein interactions; Cytoskeleton; Membrane function 73, 121
- Lateral phase separation**; Phospholipase A₂; Lipids; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209
- Length scale**; Time scale; Nuclear magnetic resonance (NMR); Correlation time 73, 27
- Lipid**; Flash photolysis; Membrane; Rhodopsin; Signal transduction; Vision 73, 159
- Lipid domains**; Dipole potential; Surface potential; Bilayer membranes; Monolayers; Hydration force 73, 57
- Lipid domains**; Phospholipids; Phase transition; Phase-separation dynamics; Local order; Dynamic heterogeneity; Cholesterol; Drugs 73, 3
- Lipid hydrolysis**; Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Enzyme kinetics; Enzyme activation 73, 209
- Lipid microdomains and macrodomains**; Membranes; Protein-lipid interactions; Hydrophobic mismatch; Lateral diffusion; Bacteriorhodopsin 73, 139
- Lipid-protein interactions**; Biomembranes; Peripheral proteins; Lipids 73, 181
- Lipid-protein interactions**; Membrane structure; Lateral phase separation; Immiscible mixtures; Cytoskeleton; Membrane function 73, 121
- Lipids**; Biomembranes; Peripheral proteins; Lipid-protein interactions 73, 181
- Lipids**; Phospholipase A₂; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209
- Local order**; Phospholipids; Phase transition; Phase-separation dynamics; Dynamic heterogeneity; Lipid domains; Cholesterol; Drugs 73, 3
- Lysophosphatidyl choline**; Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209
- Mechanism**; Fusion; Polyethylene glycol; Membrane structure 73, 91
- Membrane**; Flash photolysis; Lipid; Rhodopsin; Signal transduction; Vision 73, 159
- Membrane function**; Membrane structure; Lateral phase separation; Immiscible mixtures; Lipid-protein interactions; Cytoskeleton 73, 121
- Membrane structure**; Fusion; Polyethylene glycol; Mechanism 73, 91
- Membrane structure**; Lateral phase separation; Immiscible mixtures; Lipid-protein interactions; Cytoskeleton; Membrane function 73, 121
- Membranes**; Lipid microdomains and macrodomains; Protein-lipid interactions; Hydrophobic mismatch; Lateral diffusion; Bacteriorhodopsin 73, 139
- Molecular lattice**; AFM; Monolayer; Langmuir-Blodgett-Films; Polymerizable lipids; Fluorescence 73, 81
- Monolayer**; AFM; Langmuir-Blodgett-Films; Polymerizable lipids; Molecular lattice; Fluorescence 73, 81
- Monolayers**; Dipole potential; Surface potential; Bilayer membranes; Lipid domains; Hydration force 73, 57
- Nuclear magnetic resonance (NMR)**; Time scale; Length scale; Correlation time 73, 27

P-glycoprotein; Phospholipid asymmetry; Amino-phospholipid translocase; Flippase; Cell shape; Phosphatidylserine 73, 107

Peripheral proteins; Biomembranes; Lipids; Lipid-protein interactions 73, 181

Phase transition; Phospholipids; Phase-separation dynamics; Local order; Dynamic heterogeneity; Lipid domains; Cholesterol; Drugs 73, 3

Phase-separation dynamics; Phospholipids; Phase transition; Local order; Dynamic heterogeneity; Lipid domains; Cholesterol; Drugs 73, 3

Phosphatidylserine; Phospholipid asymmetry; Amino-phospholipid translocase; Flippase; P-glycoprotein; Cell shape 73, 107

Phospholipase A₂; Lipids; Lateral phase separation; Dynamic heterogeneities; Fatty acids; Lysophosphatidyl choline; Lipid hydrolysis; Enzyme kinetics; Enzyme activation 73, 209

Phospholipid asymmetry; Amino-phospholipid translocase; Flippase; P-glycoprotein; Cell shape; Phosphatidylserine 73, 107

Phospholipids; Phase transition; Phase-separation dynamics; Local order; Dynamic heterogeneity; Lipid domains; Cholesterol; Drugs 73, 3

Polyethylene glycol; Fusion; Membrane structure; Mechanism 73, 91

Polymerizable lipids; AFM; Monolayer; Langmuir-Blodgett-Films; Molecular lattice; Fluorescence 73, 81

Protein-lipid interactions; Membranes; Lipid microdomains and macrodomains; Hydrophobic mismatch; Lateral diffusion; Bacteriorhodopsin 73, 139

Rhodopsin; Flash photolysis; Lipid; Membrane; Signal transduction; Vision 73, 159

Signal transduction; Flash photolysis; Lipid; Membrane; Rhodopsin; Vision 73, 159

Stratified membranes; Bilayer mechanics; Vesicle shape dynamics; Interlayer coupling and dissipation; Vesicle bilayer tethers 73, 39

Surface potential; Dipole potential; Bilayer membranes; Monolayers; Lipid domains; Hydration force 73, 57

SV40 T antigen; DNA replication; Cardiolipin; DnaA protein; DNA topoisomerase I; Histones 73, 223

Time scale; Length scale; Nuclear magnetic resonance (NMR); Correlation time 73, 27

Vesicle bilayer tethers; Bilayer mechanics; Vesicle shape dynamics; Stratified membranes; Interlayer coupling and dissipation 73, 39

Vesicle shape dynamics; Bilayer mechanics; Stratified membranes; Interlayer coupling and dissipation; Vesicle bilayer tethers 73, 39

Vision; Flash photolysis; Lipid; Membrane; Rhodopsin; Signal transduction 73, 159
